

# ABOUT CLIPPER AVIATION

Clipper Aviation was founded on the principles that **doing things the right way** is the only way. We focus on the details because they matter. We offer industry-leading flight training, world-class maintenance, unparalleled charter services, and white glove aircraft brokerage.

We set out to create an aviation community that was **second to none**. We believe this is what makes us special. Simply put, aviation is not a solitary journey.

We **invite you** to tour our beautiful facilities to meet our passionate team of aviators, technicians, and instructors and check out our fleet of aircraft.

## WHY TAKE THIS COURSE?

You've encountered unusual attitudes in your aviation journey. But it's very likely that your training thus far has only scratched the bare surface of aerodynamic upsets.

Upsets due to loss of control happen when you least expect them. And when they do, the first few seconds often determine the outcome. Do you know how to recover an aircraft when you suddenly find your world upside down?

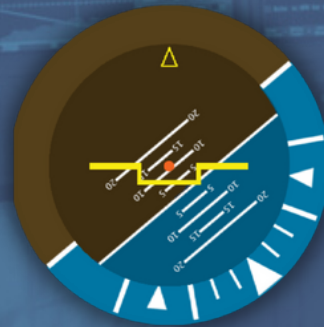

This course equips you with the knowledge and skills to quickly and effectively mitigate LOC due to aerodynamic upsets or loss of situational awareness. Whether you're a budding Private Pilot or an experienced aviator, this course is tailored for your skill level and operational context to ultimately equip you with the discipline to survive when the unexpected happens.

## COURSE STRUCTURE

**3** **MODULES**  
Covering Different Spin Modes, Stall Series, Unusual Attitudes, Various Upset Modes, Instrument LOC, Basic Aerobatics.

**2** **INSTRUCTORS**  
Working with two expertly trained and highly qualified aerobatic and UPRT instructors to ensure in-depth understanding.

**LOSS OF CONTROL IS THE NUMBER-ONE CAUSE OF AIRCRAFT ACCIDENTS. UPSET PREVENTION AND RECOVERY TRAINING CAN HELP PREVENT YOU FROM BECOMING A STATISTIC.**

**"It is possible to fly without motors, BUT NOT WITHOUT KNOWLEDGE AND SKILL" - WILBUR WRIGHT**

## OUR AIRCRAFT

With a shorter fully symmetric wing than it's more tame brothers, the most powerful engine offered by American Champion, an inverted oil system, the ACA Xtreme Decathlon is the ideal pairing of excitement and capability for aerobatic and UPRT training.

### ENGINE

210 horsepower. 2700 RPM.  
390 Cubic Inches. 8.6lb/HP.  
Capable of 2 minutes inverted flight.

### PERFORMANCE

+6, -5 G's. 520' Ground Roll.  
1500 FPM Rate of Climb.  
161 MPH TAS.

### THE MANEUVERS

Loops. Rolls. Cuban Eights.  
Spins. Hammerheads.  
Immelmanns. Split S. Much more!

## COURSE DURATION

**12** HOURS **12** HOURS  
GROUND FLIGHT

**COURSE COST**  
**\$5,049**
